Q-SYS

A New Workspace Experience

The office has a new role.

It's a people-centered destination that connects teams through purposeful connection and rich collaboration experiences.

Companies need to adopt a new kind of meeting space, one that delivers an elevated experience for all meeting participants both in-room and remote.

Companies are creating high-impact spaces

33%

of IT decision makers are building newer types of meeting spaces as a result of evolving work models[1]

Q-SYS

High-Impact Spaces: the New Category of Meeting Spaces

What are high-impact spaces?

High-impact spaces are dynamic, scalable meeting spaces that provide an immersive, engaging experience for in-room and hybrid participants.
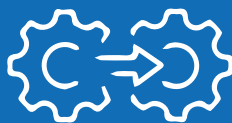

How do high-impact spaces help organizations?

High-impact spaces enable collaboration that goes beyond the boundaries of ordinary meeting spaces. They help organizations turn their underutilized spaces into dynamic hubs for hybrid collaboration.

**How do companies create high-impact spaces?**

Q-SYS gives your teams the tools and technology they need to rebuild team collaboration across divisible rooms, training rooms, all hands rooms and other high-impact spaces.

Q-SYS

Benefits of High-Impact Spaces

INTEGRATED

Equip every space with professional-grade AV and control platforms, integrate with major collaboration platforms—Google Meet, Microsoft Teams and Zoom.

FLEXIBLE

Adapt to engagements that require different functionality, including multi-zone audio, video distrbution, automatic multicamera switching.

SCALABLE

Equip high-impact spaces at scale with software-based audio, video and control solutions.

AUTOMATED

Enable a repeatable, effortless, elevated collaboration experience reducing the need for constant IT and AV support.

Q-SYS

Advanced Features in High-Impact Spaces

These valuable features enable better collaboration between the participants in the room and enable hybrid workers to have the same meeting experience as their in-room counterparts.

### Automatic Multi-Camera Switching

Equip spaces with as many network-based Q-SYS cameras as needed, Q-SYS delivers a single video stream to your UC platform while switching cameras automatically.
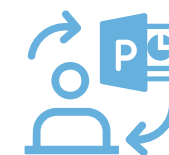

Keep Meetings on Track

Q-SYS Reflect Enterprise Manager provides real-time status and event logs to catch issues, helping you remotely troubleshoot or assist users to reduce downtime.

Seamless Hybrid Meetings

Simply connect a single USB to a Q-SYS Core processor or USB endpoint to share the room's audio and conference camera feeds with remote attendees.

Video Streaming & Collaboration

Transport HDMI video and audio from PCs to LED displays and projectors anywhere in the space.

Intuitive Control

Use the Q-SYS full-featured control platform to customize the AV experience based on how your users utilize the space.

Q-SYS Certified Solutions

Q-SYS offers a number of certified solutions for modern UC applications. Simply connect with a single USB connection, and leverage the power of Q-SYS to enable your high-impact spaces.

5 High-Impact Spaces that Transform Collaboration

DIVISIBLE ROOM

TRAINING ROOM

BOARDROOM

ALL HANDS SPACE

FLEX SPACE

Q-SYS

1 DIVISIBLE ROOM

Flexible and Automated

ROLE: Adapt to a variety of use cases, from large departmental meetings to user testing.

BENEFIT: A Divisible Room equipped as a high-impact space can switch roles at the push of a button—minimizing downtime and enabling an organization to have a greater variety of meetings and get more efficient use out of a single space.

Q-SYS provides the technology to quickly and easily adapt the space—end-users can use the intuitive control panel to manage room combining and other features, all of which can be easily customized to the space's needs.

Q-SYS

2 TRAINING ROOM

Familiar and Captivating

ROLE: Create a captivating learning environment that inspires in-room and remote participants.

BENEFIT: A Training Room equipped as a high-impact space ensures everyone can be an active part of the training experience. In-room and hybrid participants are on an equal footing, ensuring a seamless flow of information and ideas.

Q-SYS makes it simple to scale the familiar collaboration user experience into training spaces to create a captivating learning environment. Easily connect with remote meeting participants through any modern UC platform and distribute video content throughout the room or into overflow spaces.

Q-SYS

3 BOARDROOM

Equitable and Elevated

ROLE: Enable the seamless flow of communication, sharing important information and minimizing distraction.

BENEFIT: A Boardroom equipped as a high-impact space leaves nothing to chance—ensuring a consistently professional, intuitive and elevated collaboration experience for all attendees, whether in-room or remote.

Q-SYS delivers a holistic user experience from UC platform integration to room automation and beyond. The seamless user interface and control integration ensures there are no distractions from high-value meetings.

Q-SYS

4 ALL HANDS SPACE

Engaging and Streamlined

ROLE: All Hands Spaces are a forum for company-wide meetings, bringing greater alignment and fostering company culture but they may also need to double as a workspace or collaboration room.

BENEFIT: An All Hands Space with the full functionality of a high-impact space provides an engaging, inspiring experience for in-person attendees. Remote participants can engage, ask questions, and feel an integrated part of the company in these large-scale meetings.

Q-SYS has the unique flexibility to support All Hands Spaces, using automatic camera feeds to provide a single clear visual focus for hybrid attendees. The UC platform integration ensures hybrid attendees can use a familiar interface to participate.

Q-SYS

5 FLEX SPACE

Versatile and Feature-Rich

ROLE: Flex Spaces need to change day to day, based on the needs of the people using them.

BENEFIT: Flex Spaces with the functionality of high-impact spaces act as the perfect catalyst for spontaneous, ad-hoc collaboration. Remote participants aren't left out of the meeting, even an impromptu one.

Q-SYS provides the versatility of choice to architect an area as dynamic as your team whether it be connection through modern UC Platforms, best-in-class audio and video distribution, or room automation.
