

Government Installation Story

The Arunachal Pradesh State Assembly (APSA) located in the Eastern Region of India is visited by assembly members and top ranked officers from the Indian Government.

With confidential meetings taking place in the Main Conference Hall, APSA needed an easy-to-use solution that ensured only authorized personnel could present during meetings.

After looking at competitive solutions, Cineworth Sales & Services, a reputable integrator in the region, proposed the Q-SYS™ Platform from QSC. The Q-SYS Core 1100 processor provided the necessary AEC processing for the high microphone channel count in the Main Conference Hall making it an ideal solution.

The Hall was inaugurated by the Honorable President of India. Attendees were impressed with the system's distinct voice clarity and easy of operation.

State Assembly (APSA) Arunachal Pradesh, India

“We opted for the Q-SYS Core 1100 for its scalability and unmatched features for expansion and control, as well as being competitively priced.”

- Rupjyoti Dutta Phookan, Cineworth Sales & Services

Model	Description	Image
Q-SYS Core 1100 Enterprise processor	256 x 256 low latency network audio channels and 72 AEC processing channels
