

RAVE 522aa

QSControl.net™ Digital System

THX

QSControl.net, QSC's next generation network audio system, achieves the seamless integration of the company's signal transport, control, processing, and monitoring technologies. QSControl.net brings together QSC's digital, power amplification and loudspeaker products into a unified system that enables the user to administrate it all via a fully integrated graphical user interface. The new generation RAVE devices are designed to operate under the company's QSControl.net platform.

RAVE 522aa

The RAVE platform meets the processing and signal transport needs of audio systems over an Ethernet network. The RAVE 522aa units combine two distinct QSC technologies within a single hardware unit. Configurable DSP, and CobraNet™ audio transport are seamlessly integrated into one powerful single RU package.

Through QSControl.net, QSC's BASIS™ and next-generation RAVE and DSP products can be networked together and controlled from a single software interface. In addition, multiple networked computers can be set up to control and monitor all of the units simultaneously.

Fixed Latency DSP

Users of most other configurable DSP systems are familiar with a variable latency inherent in the processing configuration. Add more processing blocks and you also add delay, whether you want it or not. QSC's DSP engine is unique in having a short and fixed processing latency through the DSP subsystem. When the A/D and D/A converters are included, the total analog-to-analog latency of a single unit is a negligible 2.354 milliseconds. QSC's fixed latency DSP is configurable DSP that stays fast and predictable from one configuration to the next.

Inputs		DSP	Outputs	
Analog	CobraNet		Analog	CobraNet
8 line level	16 x 32	24 x 24	8 line level	32

Features

- · Configurable DSP functions and signal paths
- Fixed latency DSP engine
- · Ethernet controllable
- · CobraNet audio transport with new intuitive GUI
- Two Ethernet ports CobraNet and control can be run over a single cable or be divided between the two ports. The CobraNet port is 100Base-T. The control port is 10Base-T
- Each unit can store eight design configurations that can be changed on the fly
- · Snapshots can recall config or block and/or parameter settings
- THX[™] approved for professional cinema applications

DSP functions include, but are not limited to:

- Matrix mixer any size, up to 24 x 24
- · Automixers gain sharing
- Routers any size, up to 24 x 24
- · Gain controls any channel count, up to 24
- Graphic equalizers
- Filters high-pass, low-pass, all-pass, shelf, parametric, parametric shelf, Butterworth high and low-pass, Linkwitz-Riley high and low-pass, Bessel-Thomson high and low-pass
- Crossovers Linkwitz-Riley, Butterworth, Bessel-Thomson in-phase, Bessel-Thomson symmetrical, 2-way, 3-way, and 4-way general purpose adjustable
- · Compressors, peak limiters, AGC's, gates, dynamics processor
- Duckers up to 8 channels, up to 60 seconds fade in and fade out times, priority mix
- · Pink noise, white noise, sine generators
- Delays
- Macros user-definable custom blocks with password protection

RAVE 522aa

PERFORMANCE

Dynamic Range (AES-17, -60 dB method, all sensitivities) Out Thru ln > 115 dB > 112 dB > 112 dB Unweighted A weighted > 118 dB> 115 dB > 115 dB

Distortion (20 Hz - 20 kHz, all sensitivities)

< 0.009% THD+N < 0.009% THD+N < 0.009% THD+N +4 dBu (maximum) 2 dB below clip (maximum) < 0.009% THD+N < 0.009% THD+N < 0.009% THD+N

Crosstalk (20 Hz - 20 kHz) Inter-channel (maximum) Inter-channel (typical) > 90 dB Intra-channel (maximum) > 85 dB Intra-channel (typical) > 100 dB

Frequency Response 20 Hz – 20 kHz (maximum) +/- 0.5 dB 20 Hz - 20 kHz (typical) +/- 0.2 dB

Audio Converters 24 bit, 48 kHz, in and out Mute Infinite attenuation Standard CobraNet™ latency Delay

Low latency RAVE to Network 4.438 milliseconds 7.104 milliseconds Analog input through full DSP chain to CobraNet output

Network to RAVE 6.313 milliseconds 3.646 milliseconds CobraNet input through full DSP chain to analog output

5.417 milliseconds RAVE to RAVE 8.083 milliseconds

Analog input through full DSP chain, over CobraNet network, through full DSP chain, to analog outputs

RAVE in stand-alone mode 2.354 milliseconds (default group delay) Analog input through full DSP chain to analog outputs

INPUTS/OUTPUTS

Program Inputs

Connector type 3-pin "phoenix style" (a.k.a. "Euro style") detachable terminal blocks

Туре Electrically balanced

Grounding All shield terminals connected to chassis Pinout 1:+ / 2:- / 3:CHASSIS GND Input Impedance (nominal) Balanced: 10k ohms / Unbalanced: 10k ohms

Common-mode Rejection 20 Hz - 20 kHz (minimum): > 54 dB / 20 Hz - 20 kHz (typical): > 60 dB Input Sensitivities (variable) Vrms: 1.5, 3, 9, 18 / dBu: 5.7, 11.8, 21.3, 27.3 / dBV: 3.5, 9.5, 19.1, 25.1 **Program Outputs** 8 outputs

Connector Type

3-pin "phoenix style" (a.k.a. "Euro style") detachable terminal blocks

Electrically balanced Type

Grounding All shield terminals connected to chassis 1:+ / 2:- / 3:CHASSIS GND Pinout

CONTROL INPUTS/OUTOUTS

Relay Outputs 2 discrete floating relay switch outputs

3-pin "phoenix style" (a.k.a. "Euro style") detachable terminal blocks Connector Type Configuration Electromechanical relay 1:NC / 2:NO / 3:COM Pinout

Switching Capacity (nominal) 1A 30 VDC 4 discrete outputs **Logic Outputs**

Connector Type 2-pin "phoenix style" (a.k.a. "Euro style") detachable terminal blocks Configuration Single-ended, TTL compatible

Pinout 1:+(Signal) / 2:-(CHASSIS GND)

6 discrete inputs for TTL logic, voltage control or passive resistance Omni Inputs 2-pin "phoenix style" (a.k.a. "Euro style") detachable terminal blocks Connector Type

Single-ended, ground referenced Configuration 1:+(Signal) / 2:-(CHASSIS GND) Pinout Normal Operating Range Reads signals between 0-5 V nominally

Potentiometer Operation Use 10k ohms for full range

Voltage Tolerance +/- 48 V

Current Output 0.5 mA with 10k pot (for passive resistive controls) RS-232 Port Female DB9 connector (setup and diagnostics purposes only) Neutrik Ethercon RJ45 ruggedized data connector

QSControl Port CobraNet Port Neutrik Ethercon RJ45 ruggedized data connector Indicators

QSControl Status Yellow Link, Tx, Rx, front panel / Green Link, Tx, Rx, rear panel

CobraNet Status Yellow Link, Tx, Rx, front and rear panel

Power Blue, front panel Diagnostic Red front panel

LCD Data Display 2 line x 16 character, backlit, front panel
