High-impact spaces:

HELPING EMPLOYERS OFFER DEEPER COLLABORATION

Q-SYS™

TABLE OF CONTENTS

Employees expect more from collaboration spaces

Employee expectations are changing. They are demanding more from their work environment.
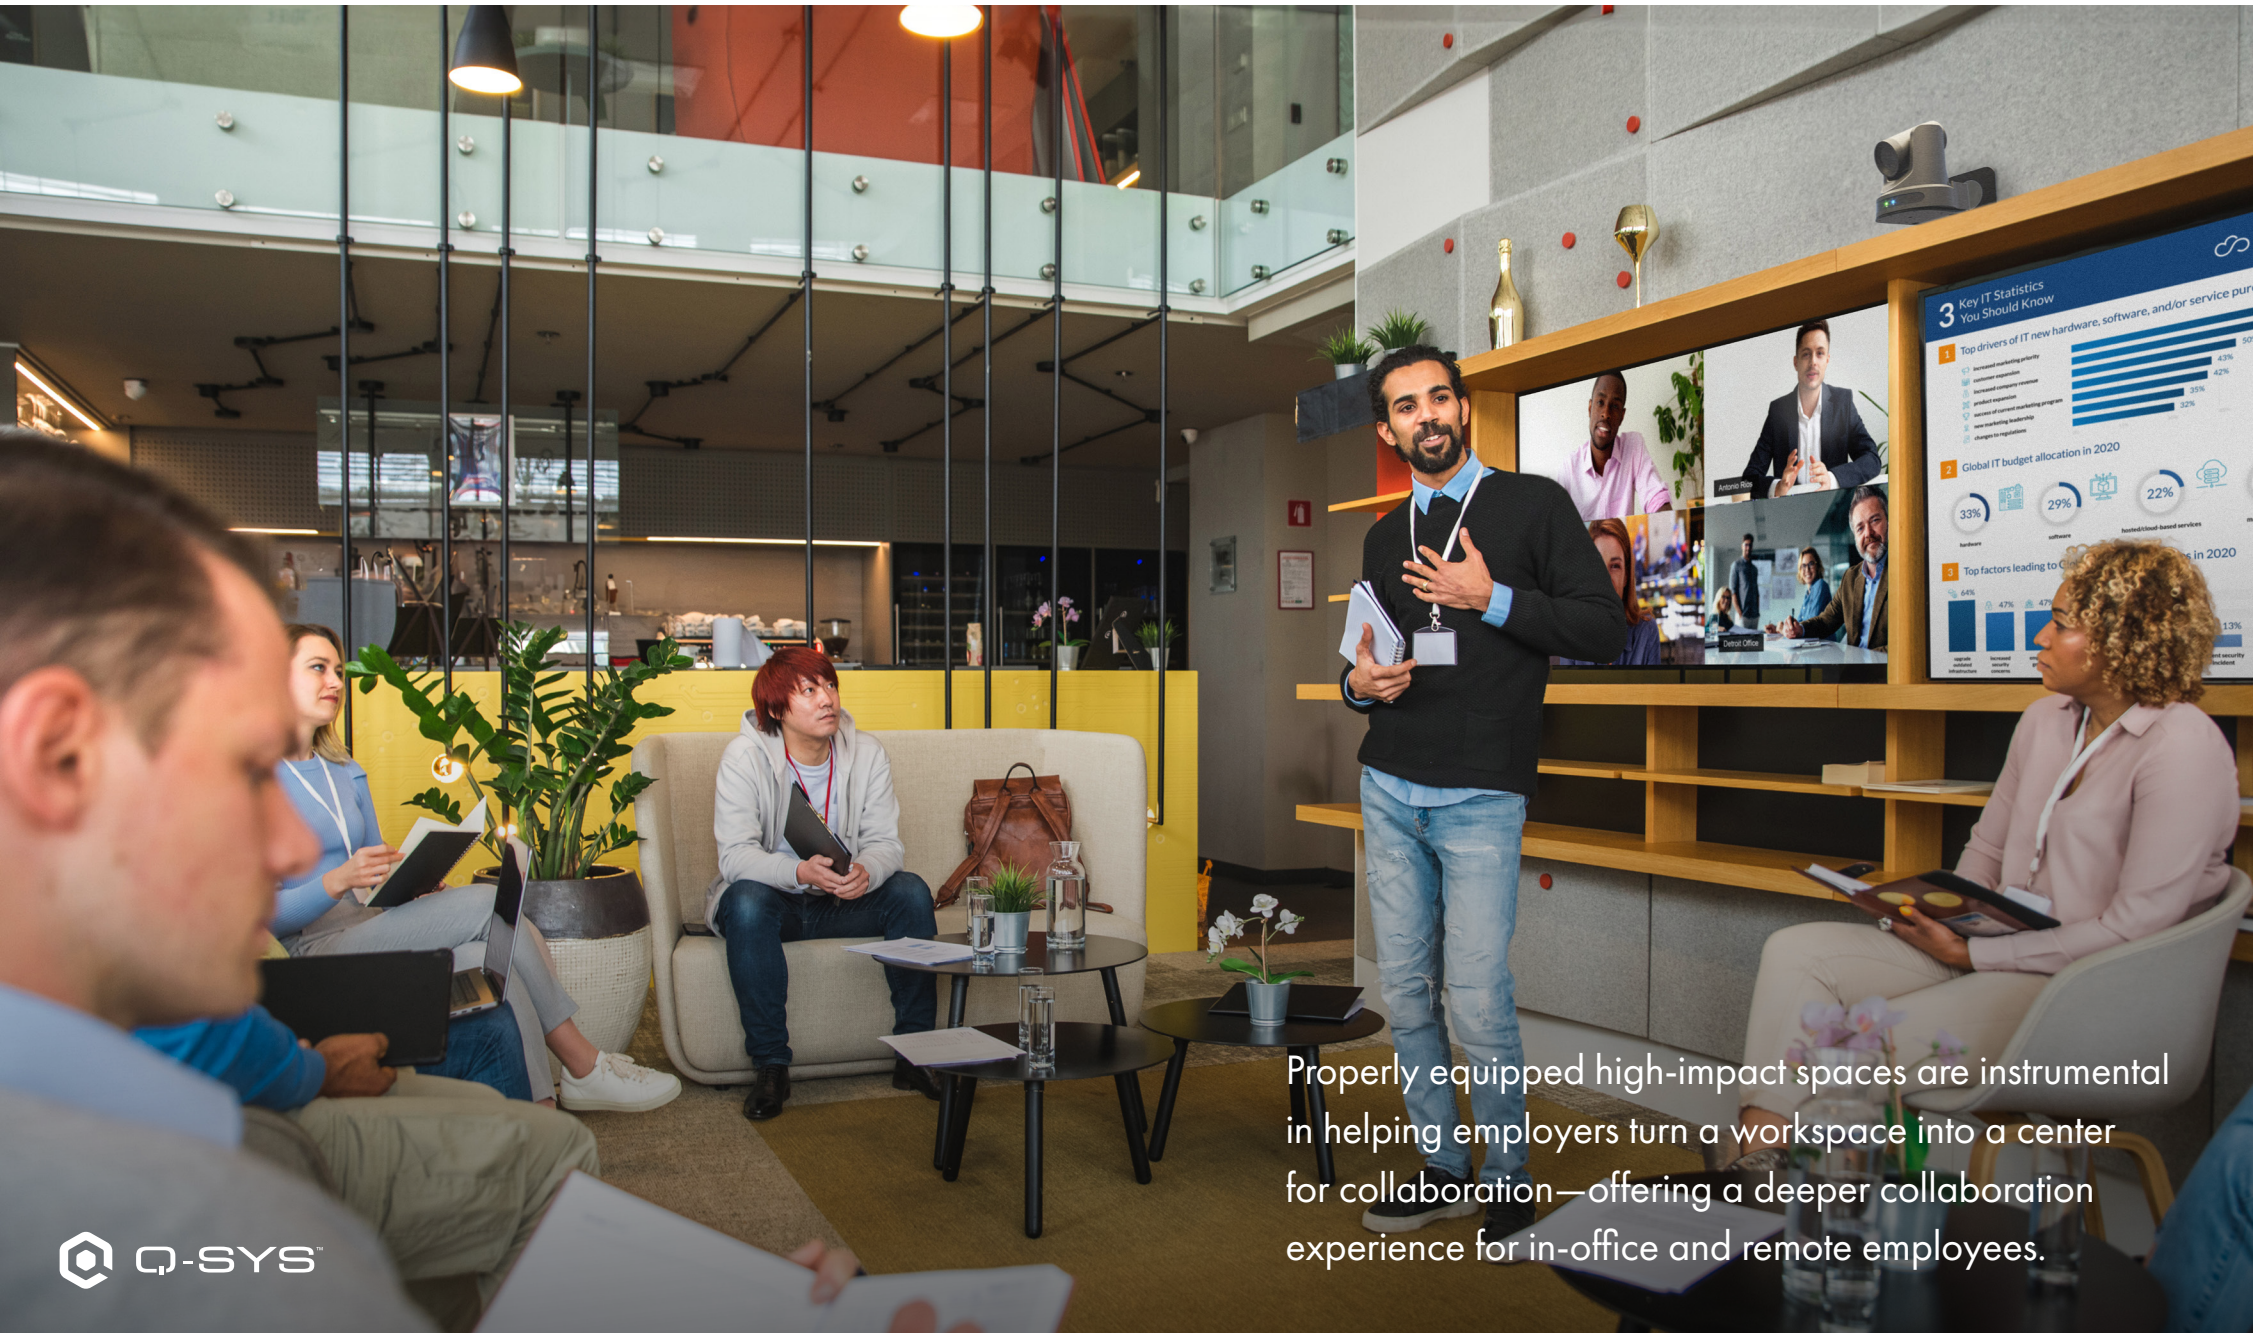

Properly equipped high-impact spaces are instrumental in helping employers turn a workspace into a center for collaboration—offering a deeper collaboration experience for in-office and remote employees.

⬡ View the office as a collaboration hub

⬡ Expect meeting equity for everyone, including far-end participants

⬡ Demand a more flexible collaboration experience

Q-SYS™

Employers must adapt their collaboration spaces

The in-office experience needs to evolve to meet changing employee needs. Offering a space for employees to work and collaborate is no longer enough. The hybrid collaboration experience needs to be built around:

- Stronger personal connections
- Greater meeting equity
- Collaboration-enhancing features

46% of organizations are modernizing office spaces and adding more technology to improve the in-office employee experience[1].

Q-SYS

Q-SYS sets the stage for deeper collaboration in high-impact spaces

Q-SYS, a cloud-enabled audio, video and control platform provides employees with a seamless collaboration experience, allowing hybrid and remote colleagues to participate as if they're in the same room.

Transform your workplace with high-impact spaces

ENHANCE COLLABORATION AND PRODUCTIVITY

High-impact spaces foster seamless collaboration, boosting productivity and collaboration.

STRENGTHEN COMPANY CULTURE

These spaces are crucial for connecting the workforce, helping to build and sustain a cohesive company culture.

PROVIDE EQUITABLE EXPERIENCES

AI-driven features ensure that all participants, whether in-room or remote, enjoy an equitable and inclusive experience.

FUTURE-PROOF INVESTMENT

Software-based platforms like Q-SYS enable continuous evolution and enhancement without expensive hardware upgrades.

Introducing Q-SYS VisionSuite

Q-SYS VisionSuite offers a powerful set of tools driven by the Q-SYS Control engine to craft a unique, responsive presenting environment in any high-impact space.

ROOM INTELLIGENCE AND AUTOMATION

Automatically activate lighting, turn on devices, or play a video when a presenter moves into a specific trigger zone.

Presenters can focus on connecting with their audience, instead of struggling with technology.
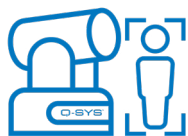

INTELLIGENT VIDEO

Full-body, AI-driven presenter tracking provides fluid follow-and-framing of the presenter's camera.

Presenters can roam the stage naturally and remain in shot—keeping remote and in-room attendees equally engaged.

INTELLIGENT AUDIO

Uses audio data from in-room microphones to determine when and where a person is speaking, recalling user-defined presets and automatically switches between Q-SYS cameras.

Far-end participants are engaged by the audience participation as well as the presenter.

FLEXIBLE CAMERA CONFIGURATION

Enables you to deploy as many Q-SYS network cameras as necessary to enable the right experience for your space.

Every angle of the presentation can be captured on video.

Applying Q-SYS VisionSuite
to high-impact spaces

EMPLOYEE NEED

Stronger personal connections

Employees need an engaging and inspiring collaboration experience that helps them connect with their in-office and remote colleagues more deeply.

An All Hands Space with the full functionality of Q-SYS creates an environment for employees to build a stronger personal connection with the company and each other.

Q-SYS

Greater sense of shared connection

DYNAMIC PRESENTATION SPACE

Room Intelligence and Automation brings an all hands space to life. It can activate devices, adjust lighting, or play music when presenters move into a specific trigger zone. The technology fades into the background, letting presenters focus on connecting with their audience.

FULL PRESENTER FREEDOM

AI-driven Presenter Tracking frees presenters from the podium. Presenters can roam the stage naturally. Every gesture and expression is captured, keeping remote and in-room attendees equally engaged.

COMPLETE CAMERA COVERAGE

Q-SYS network cameras can be positioned around the room, adapting to any layout for optimal coverage. This ensures all participants have a clear view, whether they're in-room or remote.

Q-SYS

EMPLOYEE NEED

Greater meeting equity

Employees need one consistent experience for all participants. Every participant must have a voice and be able to interact seamlessly with their colleagues, regardless of location.

A Training Room equipped with Q-SYS transforms traditional learning into an immersive, interactive experience for both in-person and remote participants.
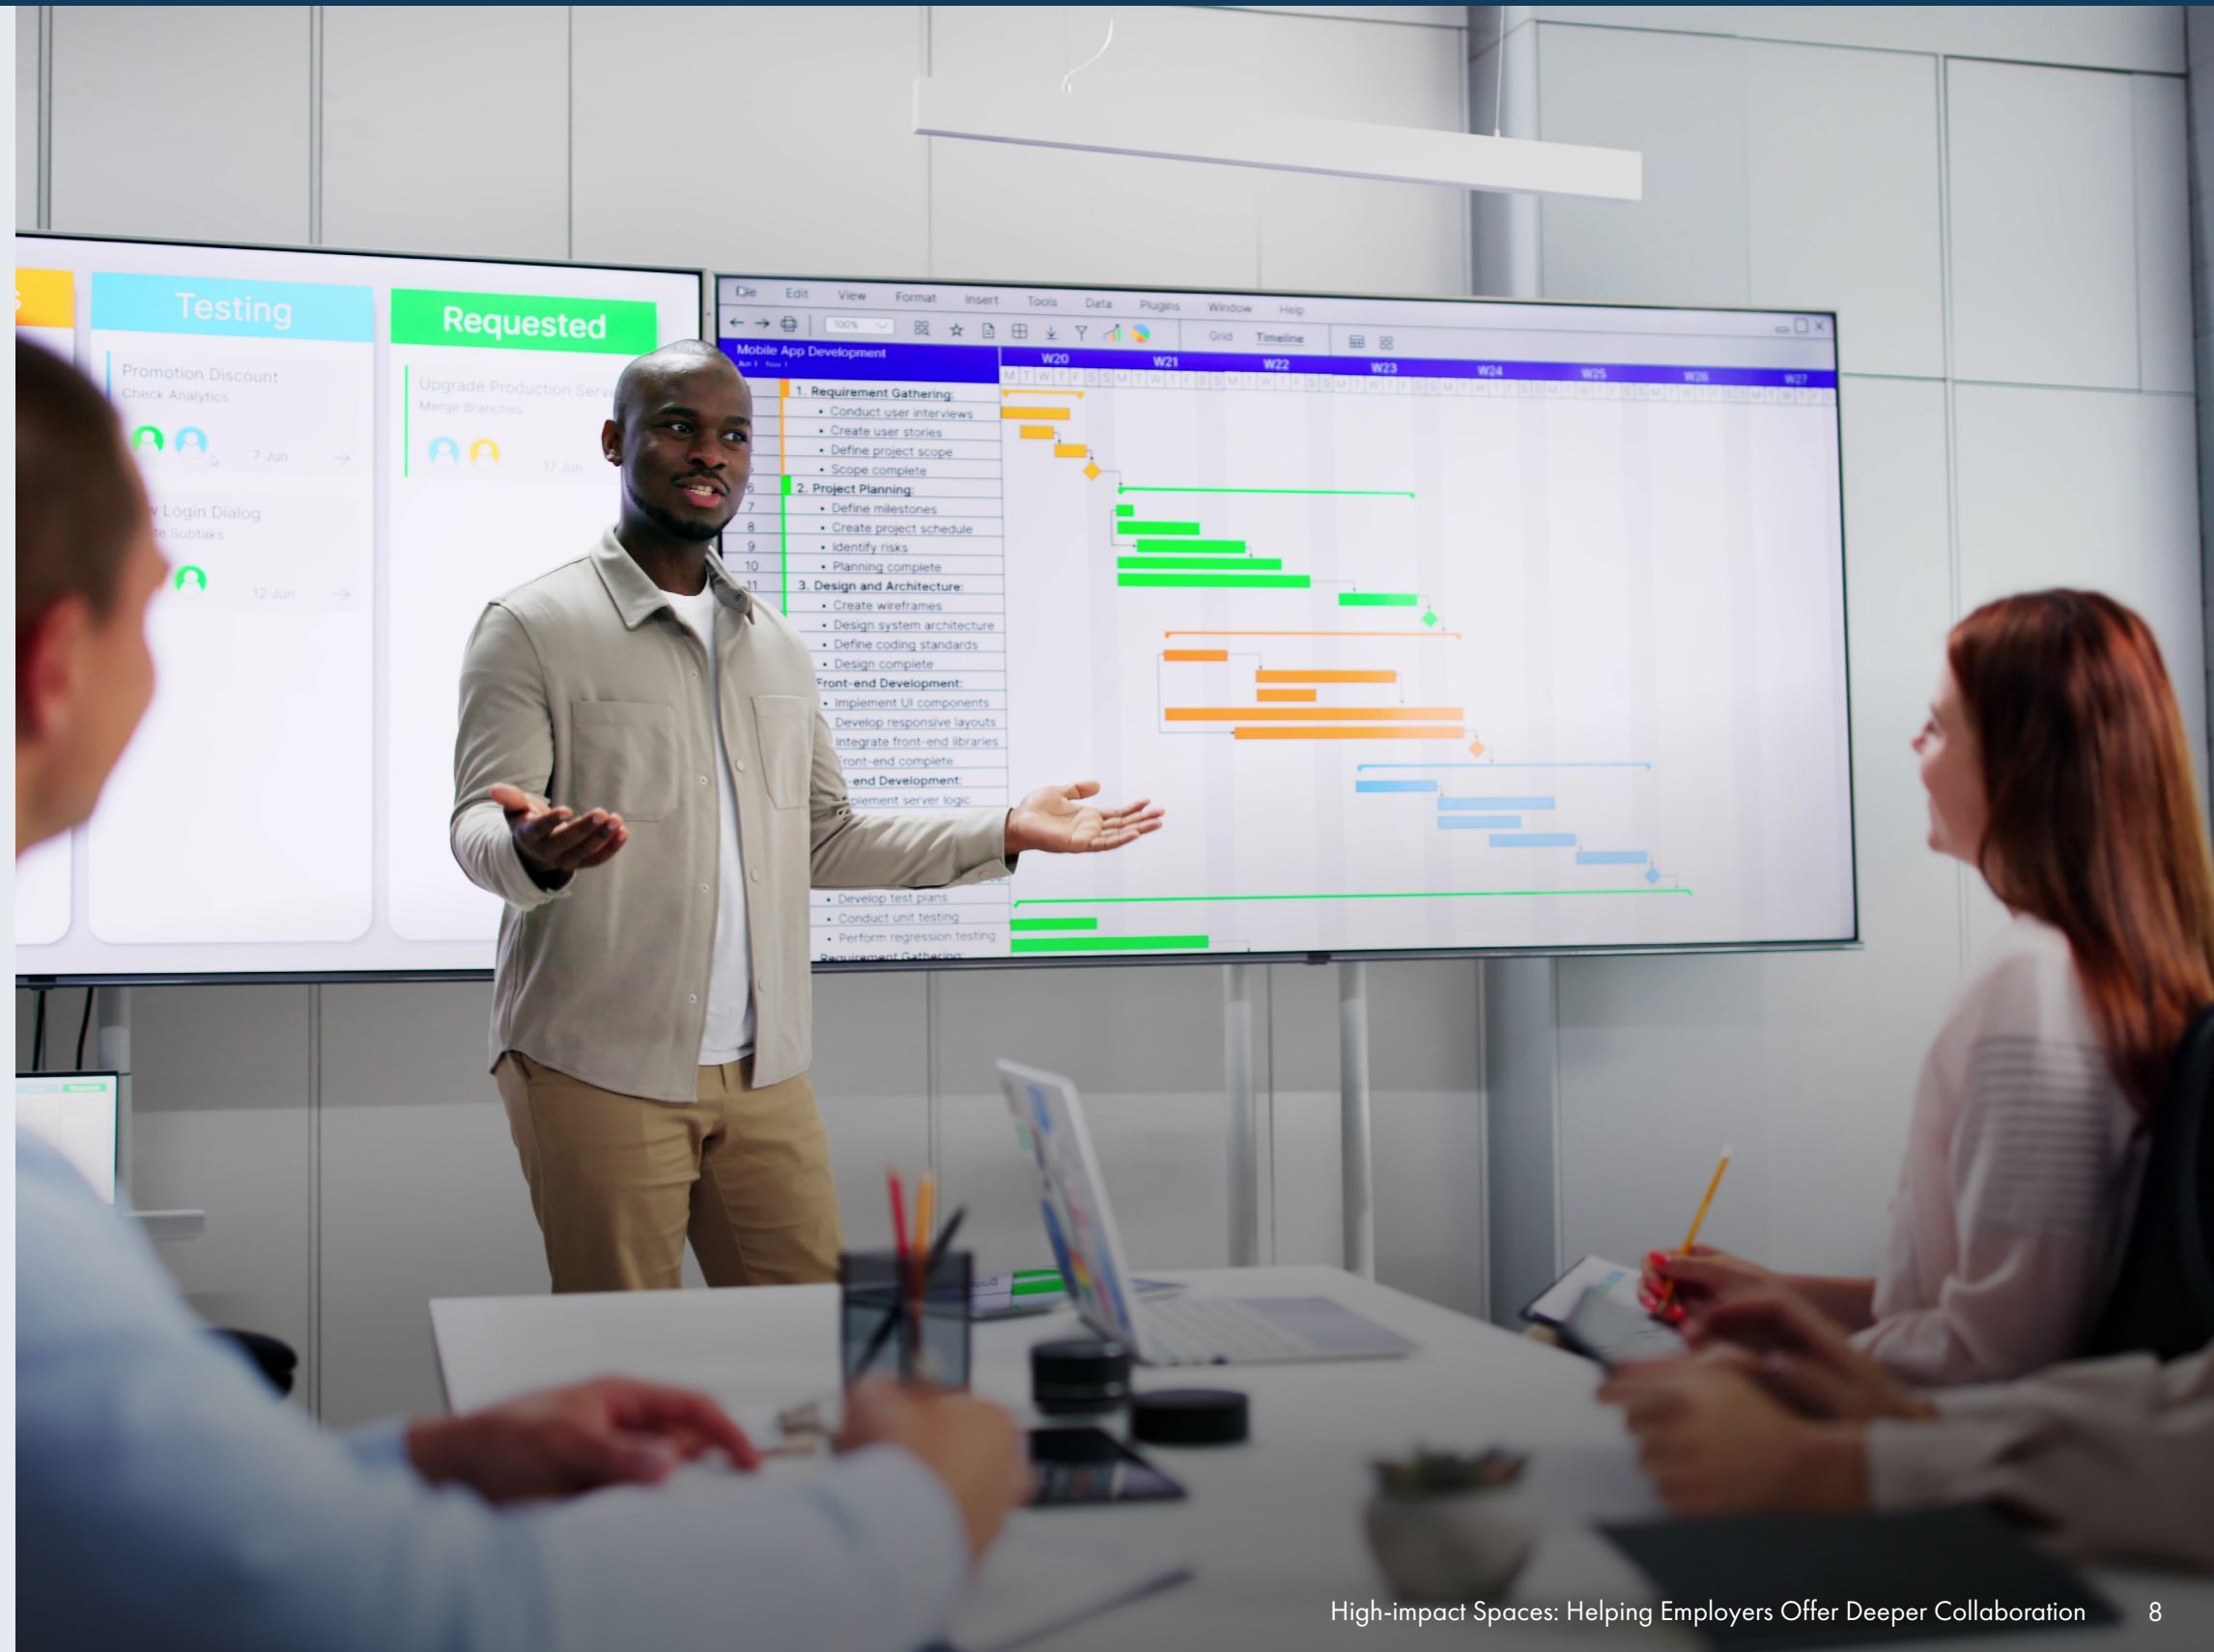

Fluid and natural collaboration between all participants

ACTIVE SPEAKER FOCUS

Intelligent Audio uses data from in-room microphones to determine when and where a person is speaking, recalling user-defined presets and automatically switching between Q-SYS cameras to focus on the active speaker, no matter where they are in the room.

PLUG-AND-PLAY CONNECTION

The *Q-SYS AV Bridging feature license* allows instructors to connect their own devices to the room's audio and video system with a single plug-and-play USB connection. It integrates Q-SYS audio and camera feeds for remote sessions, ensuring a smooth, high-quality experience for both in-room and virtual attendees.

IMMERSIVE LEARNING ENVIRONMENT

Seamless Microsoft Teams Integration allows instructors to effortlessly share content, breakout groups, and collaborative tools across all participants.

Q-SYS

EMPLOYEE NEED

Collaboration-enhancing features

Employees need functionality that enhances the collaboration experience. This means offering new features and continuous improvements for more natural and equitable interactions.

Boardrooms equipped with Q-SYS certified for Microsoft Teams solutions transform traditional meetings into dynamic, inclusive experiences where every participant feels equally present and engaged.

Seamless, focused, productive meetings

ACTIVE TALKER SWITCHING AND AUTO FRAMING

Intelligent Audio uses in-room microphone data to detect the person speaking and works with Auto Framing to adjust the camera to predefined zones and focus on the active speaker. The active speaker remains centered in the frame, helping remote participants easily follow the conversation—even as participants shift in their seats or new speakers enter.

INTUITIVE CONTROL

Users can seamlessly manage the meeting space using the *Q-SYS Control for Microsoft Teams Rooms application* running on the Teams Compute. This allows for effortless control of lighting, temperature, and AV equipment alongside the Teams Rooms system, letting participants focus on collaboration without managing multiple systems.

GREATER UPTIME

Q-SYS Reflect remote monitoring and management ensures your Teams Room is always performing at its best. IT teams can proactively address potential issues before they impact meetings, schedule updates during off-hours, and even make real-time adjustments. This behind-the-scenes efficiency ensures these mission-critical broadcasted meetings go off without a hitch.

Q-SYS™

Helping employers offer deeper collaboration in high-impact spaces

To stay competitive and meet changing employee expectations, organizations must upgrade their collaboration spaces. By investing in high-impact spaces and equipping them with Q-SYS, businesses can create flexible, future-proof environments that will continue to drive productivity and innovation for years to come.
